

A pixelated, black and white graphic of a stylized, abstract figure or shape, possibly representing a person or a large letter, composed of many small squares. The figure has a central vertical column, a horizontal bar across the middle, and several branching or protruding sections at the top and bottom, giving it a complex, almost organic appearance. The edges are jagged due to the pixelated nature of the image.

The image shows two horizontal bars representing the distribution of responses for two questions. The top bar is for 'How often do you use the Internet?' and the bottom bar is for 'How often do you use a computer?'. Both bars show a high percentage of 'Often' responses, with 'Often' being the dominant category in both distributions.

A pixelated, black and white graphic of the letters 'XO'. The 'X' is formed by two intersecting diagonal lines, and the 'O' is a simple circle. The style is reminiscent of early digital art or video game sprites.

A large, bold black cross is centered on a white background. The cross is composed of two thick, solid black bars intersecting at their midpoints. The horizontal bar extends across most of the width of the image, and the vertical bar extends across most of the height. The intersection is a solid black square.

A large, pixelated, black and white graphic of the letters 'V' and 'U'. The 'V' is on the left and the 'U' is on the right. Both letters are composed of a grid of black and white pixels, giving them a blocky, digital appearance. The 'V' has a small horizontal bar at the top left, and the 'U' has a small horizontal bar at the top right. The letters are set against a white background.
